Abstract: Under the Clean Air Act (42 U.S.C. 7521 et seq.) manufacturers and importers of on-highway motorcycles must have a certificate of conformity issued by EPA covering any vehicle they intend to offer for sale in the United States. A certificate of conformity represents that the respective vehicle conforms to all applicable emissions requirements. In issuing a certificate of conformity, EPA reviews vehicle information and emissions test data to determine if the required testing has been performed and the required emissions levels have been demonstrated. After a certificate of conformity has been issued, the Agency may request additional information to verify that the product continues to meet its certified emissions standards throughout its useful life. An agency may not conduct or sponsor, and a person is not required to respond to, a

collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9. The current ICR for on-highway motorcycle emissions certification and compliance information is set to expire on September 30, 2016. This program was previously included under the current ICR for light-duty vehicle emissions certification and in-use testing [EPA ICR No. 0783.62, OMB Control No. 2060-0104].
